ZODIAC Transport 80

Fully programmable mobile radio for professional users

66-88 MHz

200

W 160mm
H 40mm
D 155mm

1 Kg

13.8 VDC \pm 15%,
15 Watt

- Large display with 2x16 characters
- Easy to use with programmable hotkeys
- Multiple signalling methods: CTCSS, CCIR, DCS and DTMF
- Tough and well adapted to demanding environments
- Full range of accessories available

One of the smallest mobile radios on the market, it is modern and fully programmable suitable for all environments. The durable die-cast aluminium chassis makes the radio well suited for the demands of industrial and transport environments.

With a large clear 2 line display, the Zodiac Transport 80 integrates into both new and existing radio networks. It handles several different signalling methods such as Pilot tone, DCS, DTMF and several different types of 5-tone signalling.
